Basic Skills Highlight 2024 Colloquium

by Aurora V. Adaya

Mallig Plains Colleges, Inc. through the Research Department proudly held a two-day Research Colloquium with the theme "Fostering Academic Excellence through Quality-Assured Research." The event highlighted the institution's commitment to strong collaboration, smooth communication, and strict observance of protocol. on November 23-24.

The colloquium featured original research presentations from students across various departments: Criminology, Information Technology, Business Administration, Accountancy, Hospitality Management, and Education. Esteemed panelists, led by Dr. Tirso T. Reyes, Education Program Specialist of DepEd SDO, Isabela, chairperson of the evaluators to ensure the quality of the research work by delivering an insightful lecture on achieving quality research standards.

Joining him were Dr. Mario Q. Sevilla, a statistician, and Instructor Conrado B. Bangibang, content validator. For poster display, Mr. Jeriko G. Pelimiano, Ms. Rellie Q. Arandea, and Mr. Drymlad A. Rebaja who provided impartial verdict.

Thirteen group presenters showcased their studies - 4 groups from BSBA; 4 groups from Accountancy; 3 groups from Hospitality Management, and 1 from education.

The colloquium was elevated by research-related competitions such as essay writing, jingle writing, and a quiz bee, which drew enthusiastic participation from students giving awards given to outstanding, participants like: Best Group and Individual Presenter; Best Script, and Best Poster Display. The winners' names are posted on a bulletin.

The success of the Research Colloquium would not have been possible without the all-out support of Dr. Praxedes Asuncion-Ignacio, College President. Her unwavering commitment to academic excellence and dedication to fostering a culture of research provided the foundation for this event. Dr. Ignacio's leadership and vision continue to inspire the entire Mallig Plains Colleges community to strive for innovation, collaboration, and quality in all endeavors.

Moreover, the event was made possible by various working committees and solid support of heads from different courses and faculty members in the tertiary level.

The Research Colloquium demonstrated Mallig Plains Colleges, Inc.'s unwavering commitment to fostering academic excellence and producing quality-assured research. With its strong collaboration, smooth communication lines, and adherence to protocols, the institution continues to set the bar for research initiatives.

Empowering minds through excellence, Dr. Praxedes A. Ignacio, president, Mallig Plains Colleges, Inc. delivers an inspiring message to guests, learners and esteemed panel experts at the 2nd Research Colloquium, fostering a Culture of Academic Innovation and Discovery.

STATE-OF-THE-ART structure sets standards

by Mary Anne G. Alan

The old Graduate School office at Mallig Plains Colleges, Inc. (MPCI), which served the institution for decades, has undergone a remarkable transformation - renovated into the Quality Assurance Center (QAC), a state-of-the-art facility designed to elevate the institution's commitment to academic excellence and operational efficiency.

Set to debut during the PACUCOA (Philippine Association of Colleges and Universities Commission on Accreditation) visit from November 25-27, the QAC will serve as a hub for accreditation, thesis and research defenses, and administrative meetings. The room has been meticulously designed with elegant furniture and fixtures to provide a professional yet welcoming ambiance for all its intended functions.

Key highlights of the QAC include compliance documents displayed for PACUCOA's perusal, particularly from Level 2 to Level 3 accreditation requirements. These encompass ten key areas for the Bachelor of Science in Business Administration and the Elementary and Junior High School programs. The facility ensures that all materials are organized and accessible, streamlining the accreditation process for the pool of evaluators.

Adding to its appeal is the installation of the largest smart LED wall TV currently available in the market, creating a cozy yet logically advanced space to host guests and visitors with utmost comfort. This centerpiece promises to enhance presentations and collaborative activities, reflecting MPCI's commitment to staying ahead of educational innovations.

Adjacent to the QAC is the newly relocated Deans' office, ensuring easy access and continuity of services for students and stakeholders alike.

The establishment of the QAC marks another milestone in MPCI's journey toward quality assurance and academic excellence, making it a beacon of progress for the institution and its community.

Editorial

Formula Behind Triumph

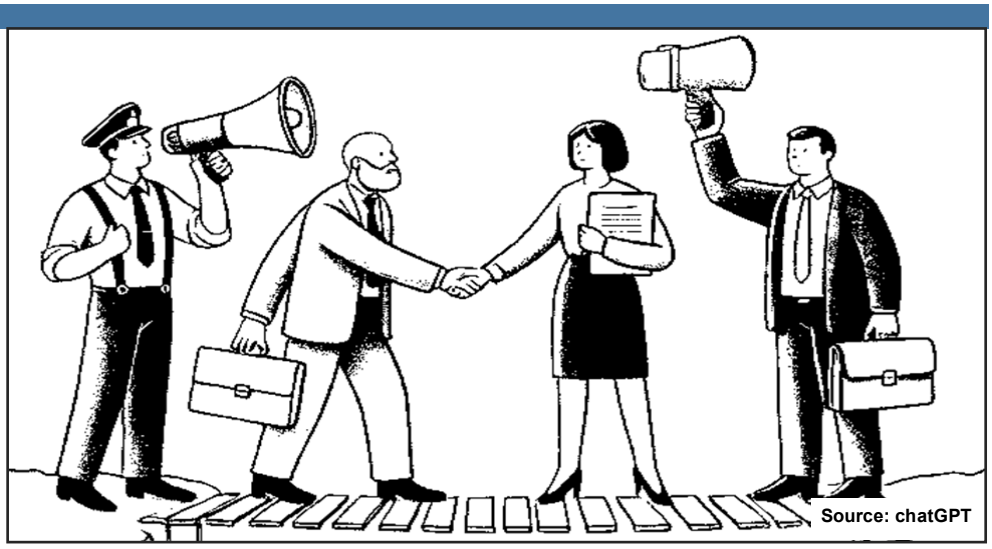

In every organization, the seamless execution of tasks and achievement of goals rely on strong collaboration, smooth communication, and strict adherence to protocols. These critical factors ensure that operations are efficient, goals are clear, and all stakeholders are aligned toward a common vision. Institutions that embody these principles are well-prepared for any challenge and are positioned for success.

Collaboration allows team members to share ideas, expertise, and resources, fostering an environment of unity. Smooth communication flow eliminates barriers, ensuring that all levels of the organization are informed and aligned. Observance of protocols provides a structured approach to operations, reducing errors and ensuring consistency. Together, these factors contribute to a culture of excellence and readiness.

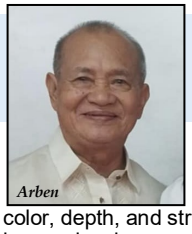

Success stories abound in organizations that prioritize these elements. For instance, an entity with clear communication lines and strong interdepartmental collaboration consistently achieved its accreditation targets ahead of schedule. Similarly, a business that adhered strictly to protocols managed to streamline processes, reduce costs, and exceed its annual growth projections. These examples demonstrate that when collaboration, communication, and protocols are upheld, "all systems go" becomes a reality.

Let's continue fostering this positive trajectory, we need to nurture collaboration through team-building activities and inclusive decision-making processes. Regular communication channels, such as forums, newsletters, and digital tools, must be sustained to ensure transparency. Additionally, periodic meetings, conduct of Learning Action Cell, and training programs can reinforce the importance of protocol adherence, equipping employees with the knowledge and discipline needed for consistent excellence.

Strong collaboration, smooth communication flow, and observance of protocols are the lifeblood of successful organizations. They create an ecosystem where efficiency, trust, and achievement thrive. Let's advocate upholding these principles for our institution to confidently navigate challenges and fulfill its vision and

Science of Synergism and Art of Action

Collaboration, communication, and protocol may sound like the foundations of a corporate handbook, but in reality, they form the canvas upon which success stories are painted. These three elements are the invisible brushstrokes that bring color, depth, and structure to our school's masterpiece. When we manage to blend them harmoniously, we create not just functional systems but a thriving community bound by a shared purpose.

Collaboration is more than working together - it is about building bridges that connect ideas, skills, and resources. In institutions like ours, it ensures that every voice is heard, every effort is valued, and every goal is shared. The Research Colloquium we recently hosted is a prime example. Students, administration, and faculty across various departments combined their unique expertise to craft research that stands out. Collaboration transforms individuals into a cohesive force capable of achieving remarkable feats.

At the heart of every thriving organization lies clear and open communication. It is the thread that binds team members, ensuring that information flows freely and effectively. Without it, even the most collaborative teams falter. The smooth communication lines evident during the colloquium - from coordination committees to the seamless presentation flow, highlight how critical this element is. It's a reminder that when everyone is on the same page, success becomes inevitable.

Protocols are often misunderstood as restrictive, yet they provide the scaffolding necessary for creativity and innovation to flourish. When rules and guidelines are respected, they create a sense of order and reliability. The strict adherence to protocols during our colloquium ensured that everything—from forming working committees to research presentations, from administering research-related contested activities with meticulously chosen adjudicators to award selections was conducted with fairness and transparency. Protocols, when embraced, cultivate trust and integrity within any system.

As a result, collaboration, communication, and protocol are not just organizational principles—they are life lessons. They teach us to respect others, value clarity, and adhere to standards. These elements guide us not only to "all systems go" but also to sustain success and excellence.

From the President's Lens

Dr. Ignacio

At Mallig Plains Colleges, Inc., we are not just shaping minds, we are building a legacy of excellence rooted in collaboration, communication, and the steadfast observance of protocols. The recently concluded Research Colloquium and the unveiling of our state-of-the-art Quality Assurance Center are testaments to what we can achieve together when these core values guide our actions. These milestones embody our collective dedication to fostering academic excellence and ensuring that MPCI remains a beacon of quality education and innovation.

As we prepare to welcome the PACUCOA accreditors, let us take pride in the journey that brought us here. Each effort, whether in research, administration, or student achievements, strengthens the foundation of our institution. Together, we shall continue to uphold the standards that define MPCI, forging a path that inspires not only our community but the generations that will follow. Let us celebrate our successes and look forward to the future with confidence and resolve.

Etymology of the Masthead

"THE SOURCE," an acronym for The Scientific Outcomes Unravelling Research and Complementary Empowerment, embodies the essence of the Research Department at Mallig Plains Colleges, Inc. It serves as a platform to disseminate significant research findings, fostering knowledge and innovation within the learning community.

The logo of "THE SOURCE" is rich in symbolism: The shield signifies protection and the enduring pursuit of truth. The person represents humanity as both the subject and beneficiary of research. The magnifying lens emphasizes inquiry and the detailed exploration of ideas, embodying the core of scientific investigation.

Together, the title and logo reflect a commitment to being the wellspring of scholarly outputs that inspire and empower.
